Safetee Connections
Tonopah, NV

University of Nevada
School of Medicine

The University of Nevada School of Medicine invites you to join us for the 2015 EMS Conference to be held September 10-12, 2015 in Elko, Nevada.

YOU REALLY CAN'T MISS THIS ONE! The conference theme is **The Bright Future of EMS**.

It is so bright, YOU GOTTA WEAR SHADES!

The pre-conference classes are spectacular! This year there will be 2 evening pre-conference classes. Day classes include a SimWar session using state of the art simulation equipment. There is a full day of Extrication or Confined Space Rescue for your choosing. For the brave at heart, we have scheduled a 4-hour Suspension Trauma class!

New speakers, new classes and a whole lot of food and fun will be available throughout the conference.

SEE YOU IN SEPTEMBER!

The conference is sponsored by the University of Nevada School of Medicine, Northeastern Area Health Education Center, which is an approved provider by the Nevada State Emergency Medical Services Section. The two day conference has been submitted for up to 21 CEUs for EMS providers. The University of Nevada School of Medicine has submitted for up to 15 of nursing education credit.

2015 PRE-CONFERENCE CLASSES

— SimWars —

Dr. Kurt Bronander

Dr. Kurt Bronander from the University of Nevada School of Medicine presents SIMULATION at its best! Participants will be divided into 3 teams. One team at a time will perform unknown scenarios using state of the art simulation patients and be given feedback from a panel of judges. After all 3 teams perform, the audience votes on a winner. Sign-up now as there is a limit of 12 students.

— T.I.M. (Traffic Incident Management) —

Trooper Jim Stewart

This nationally recognized 4-hour training is for ALL agencies that may respond to a traffic related incident. Topics covered include: Arriving at the scene, Vehicle positioning, Scene management (working with other agencies and their specific roles), Scene safety, Traffic management, EMS/Fire response and Special circumstances (hazmat, spills). This program will be presented in the morning and afternoon.

— Modern Concepts of Extrication —

Elko Fire Department Personnel

This 8-hour class will include discussion and review such topics as Vehicle Anatomy, Safety features of Hybrids, Tools and Equipment used for extrication, Staging on the Roadway, Rapid Extrication using the KED and longboard, etc.

The hands-on portion will be CUTTING UP CARS! Participants are asked to dress appropriately (long pants, steel toe or leather shoes, leather gloves and safety glasses or goggles). How much fun is this! Limited to 20 students.

— Confined Space Awareness for EMS —

Newmont Mine Rescue Team

Check it Out! This 8-hour class is a combination of classroom and hands on. We will cover what is a "confined space", typical hazards associated with confined spaces and how to mitigate them, and what types of confine spaces can be encountered in an emergency. Participants can expect to learn through open classroom discussion as well as hands on confined space entry. Please wear long sleeves, long pants and closed toed shoes. Limited to 20 students.

— Suspension Trauma —

Barrick Mine Rescue Team

Check it out! This 4-hour class is an introduction to the prevention of, rescue of and emergency medical measures associated with Suspension Trauma. The session consists of classroom lecture as well as hands on to include, pick off and raising and lowering patients involved in suspension trauma and emergency medical treatment. Bring your own harness if you like!

— Moulage Part 1: — Skills Review and Critique

Patty Winters and Company

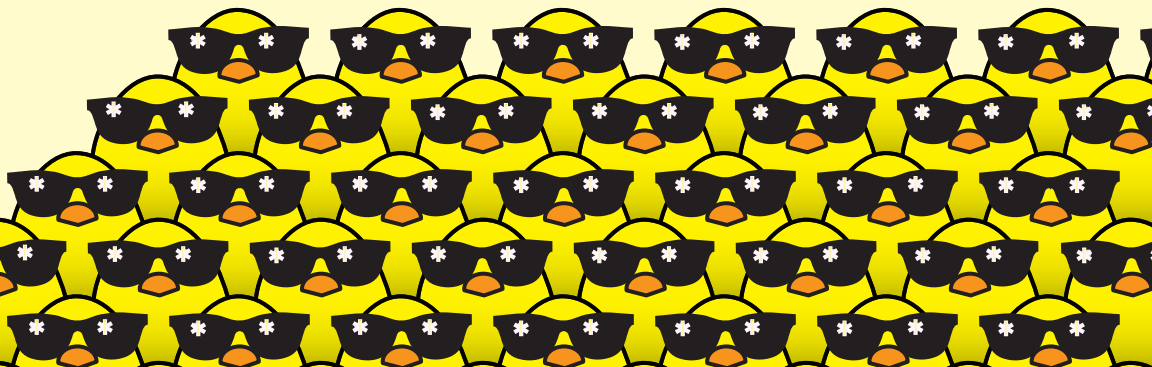

Due to the popularity of this class, we have expanded it to 3-separate sessions. Part 1 includes reviewing and critiquing moulage and its usefulness in teaching EMS classes. Parts 2 and 3 will be held on Friday during the breakout sessions.

Part 2 includes constructing injuries using moulage and Part 3 includes using those injuries in a scenario. How can you pass this up! Even better news, this class is being offered in the evening!!

— Wilderness Medicine in the Dark —

Kirk and Margaret Mittleman

ANOTHER EVENING CLASS! Join Kirk and Margaret for an evening of extra challenges by doing a wilderness rescue at night. If you want to learn about back-country medicine and how to be ready for those types of calls and times when you have very little equipment and a long way to go and IT'S DARK OUTSIDE, sign up now as space is limited.

PRE-CONFERENCE CLASSES

THURSDAY, SEPTEMBER 10, 2015

7:00 AM Pre-Conference Registration

8:00 AM - 12:00 PM

Suspension Trauma	(Limit 20)	— Barrick Goldstrike Mine Rescue Team
